ABOUT ME

I'm a results-driven backend developer with a strong passion for solving complex problems through clean, scalable, and secure software architecture. With proven experience in Django REST Framework, .NET Core, JavaScript, and NestJS, I specialize in building high-performance APIs and optimizing relational databases for robustness and speed. I thrive in fast-paced, innovation-focused environments, and bring a mindset shaped by AI, automation, and continuous learning.

PROFESSIONAL EXPERIENCE

Backend Developer - AccèsBanque Madagascar - DevHub , July 2024 - Present

- Developed and optimized backend APIs using Django REST Framework and .NET Core.
- Designed and managed relational databases (SQL Server, PostgreSQL).
- Integrated CI/CD pipelines with Docker and BitBucket for automated deployments.
- Secured applications following best security practices.
- Worked in Agile/Scrum methodology, managing tasks on Jira.

Head of Digital Innovation Department - Youth Computing, January 2024 - Present

- Led a team of developers in designing innovative digital solutions.
- Conducted training sessions on software development best practices.
- Spearheaded multiple software projects addressing real-world challenges.
- Conducted technology research to drive innovation.

Backend Developer Intern - NG Academy, May 2023 - December 2023

- Developed and maintained a financial management web application using Symfony and Django.
- Wrote technical documentation and conducted unit testing to ensure code reliability.

Hackathons

- ❖ Winner - Nexta Hackathon (2022)
- ❖ 3rd Place - HackIT Competition, University of Fianarantsoa (2023)
- ❖ Winner - University of Fianarantsoa & UNDP Hackathon (2024)

TECHNICAL SKILL

- ★ Programming Languages: Python, TypeScript, C#, Java
- ★ Backend Frameworks: Django REST Framework, ASP.NET Core, NestJS, Spring Boot
- ★ Databases: SQL Server, PostgreSQL, MySQL, MongoDB
- ★ DevOps & Tools: Docker, Git, CI/CD (Jenkins)
- ★ Testing & Quality Assurance: xUnit, NUnit, Postman, pytest
- ★ Agile Methodologies: Scrum

EDUCATION

- Master's in Artificial Intelligence - In progress
- Bachelor's in Software Development - EMIT (2023 - 2024)
- Certifications:
 - Python
 - JavaScript
 - C#
 - REST API
 - SQL
 - Machine Learning

PERSONAL PROJECTS

- ❖ AI-based Resume Screening System (Django, React, PostgreSQL)
- ❖ Expense Tracker (Flutter mobile app for budget management)
- ❖ Crowdfunding Platform (Spring Boot, PostgreSQL)
- ❖ Financial Management Web App (Django & React)
- ❖ Task Management System (.NET Core)

Languages

- Malagasy : Native
- French: Bilingual
- English: Advanced (C1)

Interests

- ★ Competitive programming
- ★ AI & Machine Learning research
- ★ Tech community involvement
- ★ Entrepreneurship
- ★ Learning new languages
